

What To do To get rid of Hemorrhoids

Pregnant women are at high risk for **hemorrhoids** during the second and third trimesters of pregnancy. **Hemorrhoids** often form as a result of increased pressure to blood vessels located in a pregnant woman's pelvic region. When labor starts the problem can worsen. The tips that follow can make it easier to avoid this annoying condition.

- Don't wait by sitting on the toilet before you're expecting a **bowel** movement.
- Do your reading elsewhere!
- Sitting in that position puts you in a constant tension, and that can be deleterious to your hemorrhoids.
- Gravity can affect your hemorrhoids, so only go when you feel the need.
- A hemorrhoid pops out of your rectum, gently push it back inside.
- Ensure that you use clean hands so that you can prevent bacteria and excess inflammation around the hemorrhoid.
- You may notice any signs of infection, see your doctor right away.

Paste Comprised of Water as Well as Powdered Myrrh can Reduce Both Swelling and Pain

Make the thick paste using one teaspoon powdered myrrh and one teaspoon water. Gently rub this paste on your hemorrhoids, then let it sit for 30 minutes. You can find powdered myrrh at beauty and health retailers.

- Witch hazel is a great **hemorrhoid remedy**.
- You can find this kind of astringent in any pharmacist or grocery retailer in your neighborhood.
- In small doses, the witch hazel can help alleviate swelling and bleeding.
- The main cause of hemorrhoids will be when you use the muscle groups inside of your sphincter an excessive amount of or you overexert them.
- Hence, it is important for you to stay aware of your daily exertions if you suffer from recurring hemorrhoids.

You can Push Your Hemorrhoids Into Your Rectum Manually

This is not for someone who has a weak stomach, but you can drive hemorrhoids into your own anus with gentle motions and a lot of care. Hemorrhoids can be protected inside your anus and may be less likely to get inflamed or bleed.

- To avoid flare ups of hemorrhoid symptoms and facilitate your movement, try squatting over the toilet instead of sitting.
- Of course, it will take a while to get used to.
- But after you begin squatting, you will find that you are experiencing less flare-ups as a result of less swelling and irritation.
- You're afflicted with hemorrhoids, take sitz baths immediately after bowel movements.
- This will help to reduce the inflammation and irritation common after each bowel evacuation.
- When you bathe or shower, pat dry your buttocks rather than rubbing them.
